SUMMARY

UX/UI designer with a background in mechanical engineering and applied experience driving end-to-end design workflows. Currently pursuing a Master's in Human-Centered Design & Engineering, seeking to leverage user research, rapid prototyping, and cross-functional collaboration to solve complex problems and deliver intuitive digital products.

EXPERIENCE

Studio Vitamin-D

Nov 2023 – Jul 2025

Jr. UX & UI Designer

Pune

- Developed low, medium, and high-fidelity prototypes in Figma to communicate interactive flows, resulting in successful stakeholder comprehension and design approval
- Analyzed complex product interfaces using qualitative and quantitative data, defined hypotheses that guided redesigns, and achieved clearer user flows and higher satisfaction
- Presented research findings and design concepts in Figma and PowerPoint to IT, product management, and development teams, securing agreement on the next design phase
- Coordinated the full design workflow with Jira and Figma, adapting to changing priorities while ensuring deliverables met quality standards, which kept the project on schedule

Ogee Studio

Jun 2023 – Nov 2023

UX Intern

Pune

- Developed comprehensive user personas and journey maps to clearly communicate complex user requirements to interdepartmental teams.
- Assisted in identifying new research questions and conducted peer research to support agile product development and independent decision-making.
- Facilitated collaborative meetings and feedback sessions to gather insights, build trustful relationships, and drive continuous design iteration.

EDUCATION

University Of Michigan, Dearborn

Aug 2025 – Apr 2027

Master's, Human Centered Design & Engineering

Dearborn, MI

- **Achievements:** Contributed to a team that secured a 15th-place overall global ranking out of 300 participating teams in the Designare international design competition.

VIT, Pune

Aug 2021 – Apr 2024

Bachelor's, Mechanical Engineering

Pune

- **Achievements:** Contributed to the 'Student Formula' team (Veloce Racing), which secured a 2nd place global ranking in 2023.

PROJECTS

Designite-Designare Conference

Jan 2026

- Designed Designare as a scalable brand-and-product system supporting real-time navigation, session management, and multi-event deployment.
- Proposed a modular brand ecosystem and a clarity-first digital product that supports real-time navigation, session management, personalization, and scalable multi-event deployment.
- My team was ranked 15th overall out of 300 teams that participated in this international design competition.

NoteLoom AI-Support Study Tool

Aug 2025 – Dec 2025

- Designed an AI-supported study platform centralizing note-taking, summarization, and recall to reduce student cognitive load.
- Raised the System Usability Scale score from 78.5 to 97.5 across three rounds of iterative testing by surfacing hidden AI tools and adding explicit affordances.

AI-Assisted In-Car Infotainment Personal Assistant

Aug 2025 - Dec 2025

- Presented the design and evaluation of an AI-assisted in-car personal assistant that enhances human-AI collaboration while minimizing distraction.
- Synthesized 15 peer-reviewed studies into 12 evidence-based design requirements spanning anomaly detection, explainability, and multimodal interaction.
- Validated trust and usability through a 25-participant survey and think-aloud testing, with 91% of users rating the AI's features as well-integrated.

GrocGenie Smart Grocery Management App

Aug 2025 - Dec 2025

- Designed a smart grocery app with AI-assisted expiration tracking and explainable recommendations to reduce household food waste.
- Ran task-based usability testing (N=10) measuring desirability, trust, and learnability, with 90% of users finding the system easy to learn and 82% disagreeing it was cumbersome.
- Identified navigation-label confusion (the "Scan" tab) through think-aloud testing and recommended microcopy fixes to improve perceived consistency.

SKILLS

- **Design & Prototyping:** User-centered design, UX design, user research, visual design, rapid prototyping, user journey, wireframing, photography, information architecture, human-computer interaction, accessibility, design systems, typography & branding
- **Applied AI & Methodologies:** Generative AI, Prompt Engineering, Prompt Chaining-, Chain of Thought Prompting, team collaboration, quick learning, stakeholder presentation
- **Tools & Technical:** Figma, Claude Code, Notion, Slack, Framer, Adobe Creative Suite, basic front-end logic, data handling

CERTIFICATIONS

- Prompt Engineering by Google: Focus on AI interaction, iterative refinement, and creative generation.
- Foundation of UX Design by Google: Focus on user journey mapping, persona development, and design principles.
